# Covid-19 Misinformation Detection

GROUP-3

Richeng Zhang  
Tengyue Chen  
Zhanfu Yang

# Overview

- ❑ Introduction
- ❑ Literature Review
- ❑ Research Question
- ❑ Exploratory Data Analysis
- ❑ Model Comparison
- ❑ Detection Model
- ❑ Result
- ❑ Model Improvement & Other Model
- ❑ Data Sources & Reference

# Introduction

- The fake news about COVID19 vaccines
- Covid-19 vaccine is threatened by fake news
- This project tries to suggests a model for detecting fake news about the COVID-19 vaccine on social media.

# Literature Review

- Fake news is considered false or misleading information spread in the media (Lazer et al., 2018)
- Fake news detection: content analysis.
- social network and neural network model
- Topic Modeling, XGBoost, LSTM, and BERT
- Challenge: Label

Example lable for COVID-19
vaccine misinformation
Abolish big pharma
antivaccine
Arrest Bill Gates
Between meandry doctor
Big pharma kills
Bill Gates Bio Terrorist
Bill gates evil
The COVID-19 vaccine causes infertility or miscarriages in women.
Natural COVID-19 immunity is better than immunity derived from a COVID-19 vaccine.

# Research Question

- Building a model to detect fake news or misinformation about the COVID-19 vaccine on Twitter.
- Helping people to understand whether the tweets are fake COVID-19 vaccine information.

# Exploratory Data Analysis

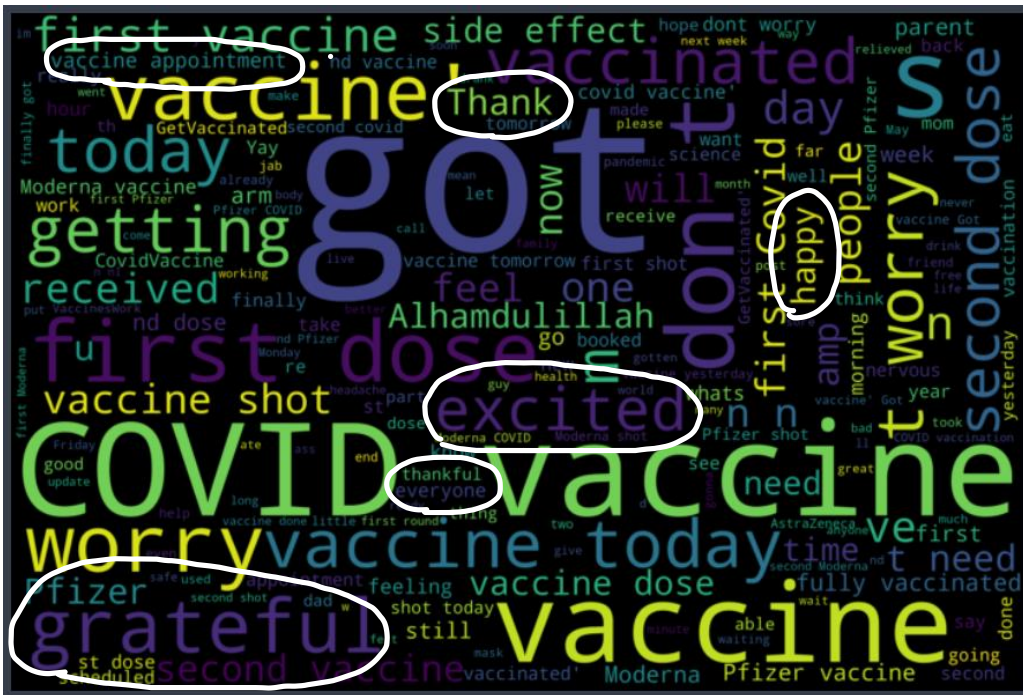

```
<class 'pandas.core.frame.DataFrame'>  
Int64Index: 12751 entries, 0 to 2483  
Data columns (total 2 columns):  
#   Column      Non-Null Count  Dtype    
---  ---        
0   is_misinfo  12751 non-null  int64    
1   text content 12751 non-null  object   
dtypes: int64(1), object(1)
```

Is_Misinfo	Number
0	4436
1	8315

THANK YOU

A photograph showing several hands holding up large, three-dimensional red letters that spell out 'THANK YOU'. The letters are held against a plain white background. The hands are positioned below the letters, with some holding the top and others the bottom. The lighting is bright and even.
